

PROFILE

I am highly motivated 2nd Year Computer Science Undergraduate student looking for employment opportunities. I am jack of all traits, can do anything with practice and training. I consider myself a cheerful, kind, and hardworking person who likes keeping things organized and arranged.

I am a Talented Programmer with the comprehensive understanding of some of computer Languages (C/C++/C# .NET Core, HTML, Java, Python(Basic), SQL). I am very keen to find a suitable engineering position with an ambitious company that offers opportunities for Placement in Software Development.

WORK EXPERIENCE

Working as Student Software Developer at TEKSEM(3rd year Placement)

Jan 2022- till Date

Part of a great Team at Teksem a renowned Cyber- security building company. I am working as Software developer , handling live project in real world. This company works around the securing networks for Big Pharmaceutical company, big industries of Oil and Gas and others.

Working at Teksem gave a full exposure to real world of coding/as Software developer.

Roshies Dine-In's & Takeaways pvt.ltd (Part time) Chef/Kitchen Assistant

August 2020 – Jan 2022

- While working with this company, I learned a lot how to be a true leader. I had gained excellent communication skills ,advising customers on the shop floor, serving on the till and working with the other colleagues.
- Plan the schedule for quality on a daily basis and manage the staff team according to daily quality target, like for preparing good quality and hygienic food for the customers daily.
- Demonstrated willingness to work flexibly in the evening and at weekends , thereby managing both my studies and work.

PROJECTS MADE

1. Design and Implementation of "Nintendo space shooting game" in C++.
2. Design and manufacturing of "Mobile shop management system" in C++ language with file base storage system.
3. Java projects : **Gadget Insurance Policy Prototype** – a simple prototype to calculate insurance money of a particular item.
4. Designed and implemented a prototype application in Java based on furniture sales.
5. Android application development : had Designed and Built a complete **Android application to provide various services**(repairing, planning, mover and shifters , health services, personal grooming) to the people.
6. Had build a **website** handling events management showcasing the working knowledge in .NET Core Skills
